

## Community activity at Global Veterinary services

Last Wednesday we had a great morning at the clinic with Jonathan Short reading his new book 'Devon the dogs adventure', that he has illustrated and written, to 25 local preschool children from New Beginnings in Gordonton.

The children were also very interested in the animals at the clinic for the morning, two rabbits, a dog and two cats.

Theo, one of the veterinarians at the clinic chatted with the children after the book reading answering questions about animals and about being a vet. The children enjoyed using the stethoscope

to listen to George the dogs' heart.

Following this Andrew another of the vets from the clinic, who works at the zoo, had a short chat about the zoo and some of the animals there.

The children then enjoyed homemade guide dog shaped cookies and tiny cupcakes, before heading back to preschool.

FREE ON-FARM NO  
OBLIGATION QUOTES

#### WHO:

Global Veterinary Services. A locally owned Gordonton business.

#### WHERE:

Located in the heart of Gordonton village since 2010.

#### WHAT WE DO:

Production animal based veterinary service also offering a primary companion animal service. As of June 2013 Hamilton Veterinary Services production animal services are now part of Global Veterinary Services production animal services.

#### NEWS:

We offer the very best of veterinary practice with an emphasis on service being done well.

We have three production animal veterinarians with a combined total of over 60 years experience.

For our small animal clients, Global vets will continue to meet your pets primary care needs. We have developed a close relationship with Hamilton Veterinary Services who have a team of companion animal veterinarians working from a well equipped small animal hospital located in Te Rapa.

#### OUTCOME:

Our three office staff, along with our three veterinarians look forward to welcoming you into Global Veterinary Services
